- Design loads are valid for a single anchor in solid brick with a compressive strengh ≥ 15 N/mm² and joints completely filled with mortar not influenced by edge distance and/or spacing. Partial safety factor for material (γ_m) is included. Partial safety factor for actions (γ_i) must be applied according to national building code.

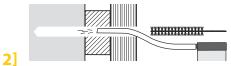

If no guidance for γ f exists Expandet recommend a partial safety factor for actions of minimum 1,5. 1 kN \approx 100 kg.

Combined resistance shall be verified if both tension and shear actions are applied: $\left(\frac{N_{Sd}}{N_{Sd}}\right) + \left(\frac{V_{Sd}}{V_{Cd}}\right) \le 1.2$

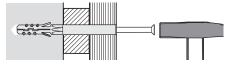

INSTALLATION:

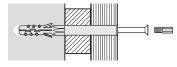

Drill a 10 mm hole through fixture and into the wall

Clean the drilled hole thoroughly
